## Werk-statt-Schule e.V.

Werk-statt-Schule is a charitable educational provider which was founded in 1983 and offered german language classes for (turkish) adolescents. Today, more than 100 employees in seven different learning centers supervise children and adolescents in distinctive disciplinary measures, training measures as well as qualification measures and qualification projects. The variety of offers is diverse and ranges from a day care nursery center to Lower Secondary Education, schools for children with special needs, vocational preparation years, various measures and projects for job orientation, apprenticeships and consultation for refugees.

Werk-statt-Schule e.V.  
gemeinnütziger Verein

## Kooperative Produktionsschule (KoPro)

Perspectives for young refugees

## How does KoPro work?

In KoPro you learn about different occupational areas. You do practical work in distinctive workshops. In the meantime, you continuously learn German.

After having tried out different occupational areas you can do one or more short internships.

The whole group cooks and eats together every day. In addition to that, there are field trips, sight-seeing walks, job application trainings, visits to helpful facilities and much more.

The program usually takes 6 months. If required, it can be adjusted individually. We also make it possible to attend the integration course parallelly.

## Our offers in the workshops

- **Wood workshop** – You can build raised plant beds and other plant containers out of recycled wood.
- **Metal workshop** – You learn about the basics of metalworking and you can build some components. You can also build objects of utility like a key ring.
- **Bicycle workshop** – In the big bicycle workshop you put bicycles together. You can utilize them within the scope of the project for your personal use.
- **SolarLAB** – You produce solar experiment sets in our workshop facilities. After that, the sets will be donated to daycare nursery centers in Hannover Region.

## Who can participate?

You are already an acknowledged refugee an recipient of unemployment benefits (ALG II)? In this case, you can consult your advisory expert in the Jobcenter Hannover

## Jobcenter Region Hannover

The Jobcenter Region Hannover guides recipients of unemployment benefits (ALG II) in Hanover Region. About 1.600 employees in 20 locations are contact persons for the clients of approximately 62.000 communities of need in hannover Region. The Jobcenter supports their clients along their way to gainful employment and thus contributes to people being able to make a living out of their own resources and efforts. It also assists in the maintenance of an employment and assures the livelihood if it cannot be maintained in any other way.
